UWA Dental School, The University of Western Australia, Perth, Australia

A/Prof. Robert Anthonappa is the discipline lead and program convener in paediatric dentistry at the University of Western Australia. He obtained his dental degree in India and then completed his Masters (Paed Dent), an Advanced Diploma in paediatric dentistry, and subsequently a Ph.D at the University of Hong Kong. He has obtained his FDSRCS and MPaedRCS from the Royal College of Surgeons of Edinburgh, and MRACDS (Paed Dent) from the Royal Australasian College of Dental Surgeons. Furthermore, he is a registered specialist paediatric dentist with the Australian Health Practitioner Regulation Agency.

He now heads the Paediatric Oral Health Research Group at the UWA Dental School, and has over 135 publications, comprising of full papers, book chapters and published abstracts, in both national and international peer-review journals. He is the recipient of several scholarships, awards and research grants. His research interests include cariology, developmental defects of dental hard tissues, dental anxiety, oral health-related quality of life changes, hypomineralised teeth, identification of genetic markers for dental and craniofacial anomalies, and evidence-based evaluation of the current treatment approaches in paediatric dentistry. He has successfully supervised several postgraduate trainees in paediatric dentistry, and is a reviewer for several peer-review dental journals.
