Bio:

Dr. Liu is as an Assistant Professor of Otolaryngology at Stanford University School of Medicine. He is co-director of the Stanford Sleep Surgery Fellowship. He is a consultant member of sleep medicine in the American Academy of Otolaryngology. He is a Stanford Biodesign Faculty Fellow.

He received medical and dental degrees from the University of California-San Francisco (UCSF). He was a former Howard Hughes Medical Institute (HHMI) Research Scholar. After maxillofacial surgery residency at UCSF, Dr. Liu completed his sleep surgery fellowship in 2014 with the Department of Otolaryngology at Stanford, and sleep surgery pioneer Dr. Robert Riley.

Dr. Liu practices the full scope of sleep apnea surgery including nasal, palate, tongue base, hypoglossal nerve stimulation (Inspire), genioglossus advancement, and maxillomandibular advancement (MMA). He introduced distraction osteogenesis maxillary expansion (DOME) with Dr. Christian Guilleminault in 2015.

Dr. Liu is also routinely referred patients for complex orthognathic surgery facial trauma. He serves as a preceptor to the Stanford Oculoplastic Surgery Fellowship.

Dr. Liu's active areas of research include dynamic airway examination to optimize sleep surgery outcome, virtual surgical planning for facial skeletal surgery, and neuromodulation of the upper airway. He has given keynote talks at preeminent sleep conferences across specialties. He has published over 70 scientific articles and medical texts, with original scientific work on sleep surgery.
